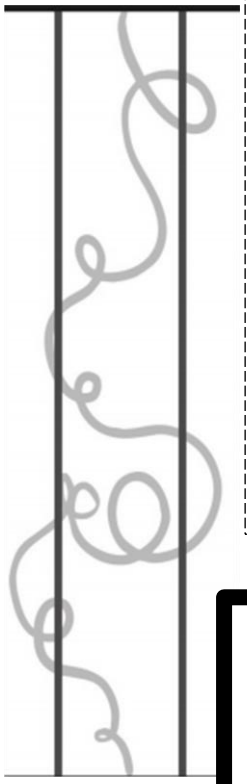
LINE

A Line is a mark that is longer than it is wide.



A line can be straight or curved. It can be horizontal, vertical or diagonal, and can change direction.

The Elements of Art

Artwork is made up of seven elements, often used together to make a final piece of art. A Line in art is defined as a point moving in space and it's one of the seven elements.

It is one of the most crucial elements, as everything begins with just a simple dot in space, which transforms into lines and then drawings.

Lines are everywhere!

Paul Klee "*A line is a dot that went for a walk*"

A line could be created using materials such as pencil, pen or a brush dipped in ink.
